Currently, after deducting the subscription paid by Poland to the EU budget, the balance is positive, so we are grateful to the countries of the European Union

**However, if we would like to complain....**

- **Polish settlement procedures are more restrictive than those of EU**
- **unsuitable support areas - millions for soft projects,  
cents for infrastructure**
- **restrictions on the distribution of funds to poorer  
areas – Mazovian district almost without money**
